### **“Empowering Your Success through Innovative Engineering Solutions.”**

Welcome to AAF Engineering - your trusted partner for comprehensive corporate engineering services!

We are delighted to have you as our valued client. Our team of highly skilled and experienced engineers is committed to providing you with top-notch solutions for all your engineering needs. Whether you require design and development, testing, prototyping, or consulting services, we have the expertise to meet and exceed your expectations. Our team is available to collaborate with you at every stage of your project, from concept to completion, to ensure that your vision is realized.

At AAF Engineering, we pride ourselves on delivering innovative, efficient, and cost-effective solutions tailored to your unique requirements. Our cutting-edge technologies, state-of-the-art facilities, and commitment to quality ensure that your projects are completed with the utmost precision and excellence. We are dedicated to building long-term relationships with our clients based on trust, professionalism, and outstanding service. Thank you for choosing AAF Engineering as your corporate engineering services provider. We look forward to working with you and contributing to your success. Please feel free to reach out to us with any questions or inquiries.

# ABOUT COMPANY

## ABOUT AAF ENGINEERING

AAF Engineering was established with an embedded vision to design, develop and implement customized electrical solutions to meet the unique requirements of our clients across various industries. Our highly experienced professionals, specialized in providing turnkey solutions for Industrial and building projects in the fields of HVAC, MEP, Electro-Mechanical, Instrumentation, Automation, and Control Systems as well as General Order suppliers all over the Pakistan.

## HOW WE SERVE

As a corporate engineering service company, we are dedicated to providing top-notch engineering solutions to our clients in the corporate sector. Our expertise lies in delivering innovative and efficient engineering services that cater to the unique needs and requirements of our corporate clients. We understand that the success of any corporate engineering project depends on a multidisciplinary approach that combines technical expertise, strategic planning, and effective execution. Our team of experienced engineers and professionals work closely with our clients to understand their specific goals and objectives and develop customized solutions.

- ✓ Design & Engineering
- ✓ Installation, Testing and Commissioning Services
- ✓ Engineering Consultancy and Services
- ✓ Project Management & Project Execution
- ✓ Infrared Thermographic Survey
- ✓ Turnkey or Customized Projects
- ✓ Automations, Hi-tech Systems & Solution
- ✓ Transformer Oil Testing & Treatment
- ✓ Maintenance of Plant/Equipment
- ✓ Diagnostic and Assessment Services

## OUR SERVICES

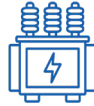

As a corporate engineering service company, we provide a wide range of services tailored to meet the needs of our clients in various industries.

We offer a wide range of comprehensive services designed to meet the unique needs of our corporate clients. Our team of experienced engineers, architects, and technical experts work collaboratively to deliver innovative and efficient solutions that drive success for your organization. Our highly experienced professionals, specialized in providing turnkey solutions for Industrial and building projects in the fields of HVAC, MEP, Electro-Mechanical, Instrumentation, Automation, and Control Systems as well as General Order suppliers. We also understand that technology is an essential aspect of engineering. As a result, we invest in the latest technology and equipment to ensure that we provide the best possible service to you. We also take safety seriously, and we ensure that all our projects adhere to safety regulations and standards. Our approach is to work closely with you to ensure that we deliver results that exceed your expectations.

### ENERGY MANAGEMENT SYSTEM

Our advanced EMS technology helps businesses and organizations to monitor, control, and optimize their energy usage, ultimately resulting in significant cost savings and reduced environmental impact.

### POWER & DISTRIBUTION TRANSFORMERS

Our power transformers are built to handle high voltages and provide reliable power transmission, while our distribution transformers are optimized for low-voltage distribution systems.

### PROCESS CONTROL INSTRUMENTATION

We offer a wide range of reliable, accurate, and innovative instrumentation solutions to our clients across different sectors. Our products and solutions include but are not limited to flow meters & level sensors.

### SWITCHGEAR

AAF Engineering deals in range of switchgear products which are designed to meet the needs of a diverse range of industries and applications, including medium voltage and low voltage.

### HVAC SYSTEMS

Our HVAC systems are designed to improve indoor air quality and provide optimal comfort in residential, commercial, and industrial settings. From air filtration systems to ventilation solutions.

### RMU's & KOISK's

AAF Engineering's RMUs and kiosks provide a comprehensive solution for clients who require reliable and safe power distribution and customized kiosks for their specific business needs.

### INDUSTRIAL AUTOMATION

AAF Engineering is a leading provider of industrial automation products and solutions that help businesses streamline their operations and increase efficiency. We also offer customized automation solutions.

### MOTORS & GENERATORS

AAF Engineering is a leading provider of Motors, Drives, and Generators products and solutions for a wide range of industries. Our extensive range of products includes AC motors, DC motors, and much more.

### SOLAR SYSTEM

Providing products and solutions for both residential and commercial applications. We offer a wide range of high-quality solar panels and other accessories that are designed to meet the needs of customer.

### GENERAL ORDER SUPPLIERS

Offering a comprehensive range of products that cater to the needs of our clients. Our portfolio includes a variety of products such as electrical equipment, mechanical tools, safety equipment.

### INFRARED INSPECTIONS

Providing solutions that are designed to help businesses and organizations identify potential problems in their electrical, mechanical, and structural systems before they become serious issues.

## OUR TARGET MARKET

Our corporate engineering company serves various industries and businesses, providing innovative solutions for their engineering needs. Our clients include large corporations, small and medium-sized enterprises (SMEs), government agencies, and other organizations that require cutting-edge engineering expertise to drive their projects and initiatives forward. From designing and developing complex systems to optimizing processes and improving efficiency, our target market spans various sectors such as manufacturing, construction, energy, transportation, telecommunications, and more. We aim to provide tailored engineering solutions that meet each client's unique requirements, delivering exceptional results and helping them achieve their business goals. Our expertise spans across various engineering disciplines, including civil, mechanical, electrical, and industrial engineering, among others

We work with clients in sectors such as manufacturing, construction, energy, transportation, technology, and more. Our expertise extends to providing engineering solutions for infrastructure development, process optimization, systems integration, product design, and project management. We strive to deliver innovative and reliable engineering solutions that help our clients achieve their business goals, improve operational efficiency, and stay competitive in today's dynamic market

## Process Industries

As a corporate engineering company, our target market is the process industry, which includes various sectors such as oil and gas, chemicals, petrochemicals, pharmaceuticals, food and beverage, and many others.

## Oil & Gas Sector

We provide a wide range and variety of specialized engineering solutions to support the oil and gas industry in maximizing operational efficiency, reducing costs, and ensuring safety and environmental compliance.

## Utilities

Our clients in the utility sector are typically large-scale organizations, such as power plants, water treatment plants, utility companies, and government entities, that require cutting-edge engineering solutions.

## Renewable Energies

Our services are designed to address the growing demand for sustainable and clean energy solutions for corporate sectors, and we strive to be at the forefront of innovation in the renewable energy industry.

## Transportations

As a corporate engineering company, our target market in the transportation sector includes various industries that require specialized engineering services to design, develop, and optimize transportation systems.

## Health Care

We understand the unique challenges and requirements of the healthcare industry, including the need for technology, robust infrastructure, and reliable systems to support patient care and ensure efficient operations

## Commercial

We cater to businesses across industries such as manufacturing, construction, energy, transportation, telecommunications, and technology. Our detailed solutions are designed to meet the unique needs of each sector.

## Water Treatment

We work with municipalities and water utilities to implement advanced water treatment solutions for drinking water and wastewater treatment. Our expertise in treatment helps ensure a reliable and safe water supply.
